## IFIP/Sec'01 - INTERNATIONAL CONFERENCE ON INFORMATION SECURITY

### Trusted Information - the New Decade Challenge

**A**s the annual conference of the IFIP Technical Committee 11 on Security and Protection in Information Processing Systems (TC-11), IFIP/SEC'01 will cover a wide range of security-related topics. It will provide an opportunity to present recent research results and case studies, as well as industrial research and development aspects in all areas of information security.

**W**ith the emerging importance of the Web and the deployment of related services, one of the special targets of the 2001 conference will be the trust and security aspects of information exchange. Indeed, with the widespread deployment of these services in an open environment like the Internet, trust and security are essential but difficult to establish.
