PREFACE

The papers contained in this volume represent the proceedings of IFIP/Sec '92, Eighth International Conference on Information Security, held in Singapore 27-29 May 1992 and organised under the auspices of the IFIP Technical Committee 11 with the cooperation of the Singapore Computer Society.

These proceedings include 5 keynote papers, 2 invited papers, 30 refereed papers and the opening speech by Dr. Tay Eng Soon, Singapore's Senior Minister of State for Education and Chairman of the Singapore National Information Technology Committee. For ease of reference, the papers are organised in the sequence of their presentation on each of the three days of the conference. Keynote and Invited papers are included at the beginning of each day, regardless of the timing of their presentation on the day.

The original title of the conference, "From Small Systems to Large," was chosen, not to de-emphasize the continuing importance of security in large computer systems, but to direct attention to the increasing importance of smaller computer systems and their related security and control concerns. Trends contributing to the increased importance of small systems include: downsizing - the replacement of large central systems with smaller distributed systems, increasingly powerful microcomputers, the increasing sophistication and acceptance of LANs, end-user computing, and the devolution of IS management to functional management. Papers with relevance to the "small systems" theme include those by Beatson, Bachelor and Kingston, McLean, Capiteijns and Angerfelt.

The final title of these proceedings derives from what became the central topic of discussion at the conference. Papers that are directly relevant to the apparent, urgent need for international cooperation on IT security standards, legislation and research include those by Madsen, Parker, Hoving, Abrams, Overbeek and Jones.

The program was designed to offer something to both the managerially, as well as the technically inclined. Sessions with relatively greater managerial content include: Security Management (2 sessions), IS Audit, and Computer Crime. The more technical sessions include: Database Security, Access Control and Detection, UNIX Security, Network Security, and Cryptography. Most papers have managerial, organisational and technical dimensions, and thus dependent upon the readers proclivities, any or all of the papers may be of interest.

We warmly thank all those who participated in the conference, and in particular the members of the organising and program committees for their significant efforts. We would also like to thank members of the International Papers Evaluation Panel, Conference Sponsors, and the IFIP TC11 Executive for their invaluable support. Special thanks to the regional papers coordinators, John Beatson, James Clark, Bertil Fortrie, Harold Highland and Basie S.H. von Solms. Special thanks also to Professor Yuen Chung Kwong, Ms. Ho Siew Foong, and Ms. Loo Line Fong, for the clerical support of the Department of Information Systems and Computer Science, National University of Singapore.

TABLE OF CONTENTS

<i>Preface</i>	v
<i>Acknowledgments</i>	ix
<i>Committees</i>	x
 <i>OPENING SPEECH: Dr. Tay Eng Soon, Singapore Senior Minister of State for Education and Chairman, Singapore National Information Technology Committee</i>	 1
 <i>RESPONSE BY: Dr. W.J. Caelli, Chairman, IFIP Technical Committee 11</i>	 3
KEYNOTE AND INVITED PAPERS	
<i>International Information Technology (IT) Security Cooperation into the 21st Century</i> <i>KEYNOTE: Wayne Madsen</i>	5
 <i>Computer Disasters: The Impact on Business in the 1990's</i> <i>INVITED: Alan Reed</i>	 13
 <i>ASEAN - Computer Crime and Corrective Action: A Status Report</i> <i>INVITED: Chew, Teck Soon</i>	 23
Security Management I	
<i>Information Security: The Impact of End User Computing</i> <i>John G. Beatson</i>	35
 <i>PRAJORIS - A Pragmatic 'Joint' Method for Raising the Information Security Level in a Company</i> <i>Dr. Steen Bentzen</i>	 47
 <i>The Status of IT Security in Leading European Organisations</i> <i>Alan Stanley</i>	 61
 <i>Findings of the Swedish CITI Project on Information Technology Security Evaluation and Certification</i> <i>Per Hoving, Mats Ohlin and Jan Rylander</i>	 73
Network Security	
<i>Secure Open Systems: An Investigation of Current Standardisation Efforts for Security in Open Systems</i> <i>Paul L. Overbeek</i>	87
 <i>Network Security: Design of a Global Secure Link</i> <i>Weijun Wang and Dr. Tom Coffey</i>	 101
 <i>MAPS - Model For Automated Profile Specification</i> <i>Dalencia Pottas and Dr. S.H. von Solms</i>	 113

KEYNOTE AND INVITED PAPERS

Cryptography and the Art of Securing Transactions 127
KEYNOTE: Chris L.J. Holloway

Restating The Foundation of Information Security 139
KEYNOTE: Donn B. Parker

Security Management II

Data Security Model for Branch Offices of Big Organisations 153
Dr. Lech J. Janczewski

Practical Security for the Small Computer User 165
David L.H. Bachelor and Peter P.C.H. Kingston

Information Security Awareness - Selling the Cause 179
Kevin McLean

A Company's Battle Against the Virus Plague 195
Peter Capiteijns

IS Audit

How Expert are Auditors in the Computer Security Field? South African Findings and Interpretations 205
Dr. Dieter Fink

IS Audit Research: A Paradigm and A Framework 221
Charlie Soh and Dr. Guy G. Gable

Cryptography

Measuring the Strength of Ciphers 235
Ms. Helen Gustafson, Dr. Edward Dawson, Ms. Lauren Nielsen, Dr. W.J. Caelli

Cryptographic Protocols and Network Security 249
Patrick Horster and Dr. Hans-Joachim Knobloch

A Solution to Generalized Group Oriented Cryptography 265
Dr. Chin-Chen Chang and Dr. Horng-Chin Lee

A Methodology For Describing Information and Physical Security Architectures 277
Dr. W.J. Caelli, Dr. Dennis Longley and Alan Tickle

Computer Crime I

A Methodology For The Investigation of Computer Crime 297
Philip M. Stanley

Detering Highly Motivated Computer Abusers: A Field Experiment in Computer Security 309
Dr. Detmar W. Straub, Ms. Patricia J. Carlson and Ms. Elizabeth H. Jones

KEYNOTE AND INVITED PAPERS

IT Crime - An Intelligence Report <i>KEYNOTE: Dr. F. Bertil Fortrie</i>	325
--	-----

UNIX Operating System Security <i>KEYNOTE: Dr. James L. Clark</i>	335
--	-----

Database Security

DISCO - A Discretionary Security Model for Object-oriented Databases <i>Martin S. Olivier and Dr. S.H. von Solms</i>	345
---	-----

Referential Integrity in Multilevel Secure Database Management Systems <i>Ms. Vinti M. Doshi and Dr. Sushil Jajodia</i>	359
--	-----

A Complex Approach to the Security of Statistical Databases Subject to Off-line Sum Queries <i>Yeow Meng Chee and Andrew Lim</i>	373
---	-----

UNIX Security

The New Security Paradigm in the Enterprise Computing Environment <i>Craig Rubin</i>	385
---	-----

Integrating B2 Security into a UNIX System <i>Kevin H. Brady</i>	395
---	-----

Access Control/Detection

Rule-based Trusted Access Control <i>Marshall D. Abrams and Ms. Ingrid M. Olson</i>	409
--	-----

Governmentware: A New Vehicle to Boost Computer Security on a National Level <i>Chien Siang Yu</i>	421
---	-----

A Rule-based Intrusion Detection System <i>Don Holden</i>	433
--	-----

Access Control - A Further Approach <i>Burkhard Lau</i>	441
--	-----

Computer Crime II

Computer Crimes: A Study of Different Types of Offences and Offenders <i>Bengt Angerfelt</i>	463
---	-----

Dealing With Computer Misuse - The Need For An International Approach <i>Michael R. Jones</i>	475
--	-----

<i>Author Index</i>	491
